IN THE SPECIFICATION

[0077] The term "computer readable medium" as used herein refers to any medium that participates in providing instructions to the processor 1203 for execution. A computer readable storage medium [[may take many forms, including but not limited to,]]includes non-volatile media[[,]] and volatile media. Non-volatile media includes, for example, optical, magnetic disks, and magneto-optical disks, such as the hard disk 1207 or the removable media drive 1208. Volatile media includes dynamic memory, such as the main memory 1204. Transmission media includes coaxial cables, copper wire and fiber optics, including the wires that make up the bus 1202. Wireless transmission media also may also take the form of acoustic or light waves, such as those generated during radio wave and infrared data communications.
